Subject: I miss you, Sam

Hi Sam,

Are you sick? How are you? You have been away from school for two days on sick leave. I am so worry about you.

I heard taking drugs is harmful to our health. Have you tried taking drugs? People who take drugs will have kidney problems. They may not be able to have the next generation. Their girlfriends may run away with other boys, too.

People who take drugs may not be able to control their body. They may hurt themselves with a pair of scissors or attempt to kill themselves.

Mixing with gangs is also not good for us. The bad people may force us to do bad things. For example, they may force us to take drugs, set fire on roads, steal, or even hurt other people. They may even ask us to do illegal things. The consequences are that we may end up in jail.

Sam, if you have problems, you can talk to teachers or your parents. You can also go to the police. I am sure they are willing to offer you help and support. Don't take drugs nor mix with gangs, Sam.

I hope I can see you soon again at school.

Chris
