Our school emphasizes building a pleasant learning routine so as to make students learn better and in a happy manner.

E-learning policy for self-contained devices is implemented to train students to learn independently through electronic resources and equipment to enhance their digital literacy challenges in the 21st century.

To reinforce the policy of self-directed learning, our study room is open until 9pm and 6pm on weekdays and Saturdays respectively, so students can consult teachers easily and study groups can be arranged easily.

We cater to students in need with One-to-Two Tutorial Scheme. Under the free will of students and the recommended teaching schedule of individual teachers, the Scheme helps to cater for learners' diversity.

We set up elite groups. Usually, after school periods or Saturdays are going to be the best time for allocating more tutorials to boost learning efficiency of the active learners. The students in the elite groups have gained satisfactory results in the past two years.

Besides the implementation of a reading scheme held by the library, an Afternoon-reading Session is available to promote a reading atmosphere.
